EXCELLENCE INITIATIVE

This summer school is to bring together students in social sciences and humanities from Europe, the Caucasus, and Central Asia to discuss the **long-term and hidden social, cultural, historical, and political consequences affecting societies situated between empires.**

We will explore the subjectivity of individuals and communities inhabiting these **in-between spaces** or **imperial peripheries** from diachronic and synchronic perspectives, while also examining their agency both within and against imperial structures.

- How have they used the available cultural repertoire?
- How have they shaped their sense of identity and understanding of the world around them?
- In what ways have they taken advantage of the opportunities that come with being part of an empire?

We will also discuss the **impact of major political transformations of the 20th century** on local communities and individuals, as well as analyse **the effects of Russia's ongoing war against Ukraine** on communities bordering the Russian Federation.
